INDIVIDUAL PREFORMED WAX PATTERN FOR METAL - CERAMIC

The great advantage of this preformed wax is that with a minimum quantity of models, we can confront the most demanding work without having to store a lot of pieces what is the reason why we had a considerable saving, more comfort and a better use of the space. We have obtained that after a thorough study collaborating with professionals of the sector that have been using them with great satisfaction.

TECHNICAL FEATURES: Easy manipulating with the spatula. It has a smooth efficient finish without pores. No residue when evaporating.

INDIVIDUAL BOX OF PREFORMED WAX: individual pieces. Box of 360 units; 5 shapes - 3 sizes. Replacements: bags of 24 units.

The technical amendments carried out in order to INCREASE the effectiveness, facilitate the work with the spatula: wider incisive and premolars. The area which is in contact with the tongue is more oval. These improvements facilitate a quicker work to obtain the dental piece.

PREFORMED WAX PATTERNS IN BLOCK FOR METAL - CERAMIC

These preformed wax patterns in block have been conceived for works where more than one dental piece has to be substituted. The great advantage of these patterns is that with a minimum number of pieces we can confront the most demanding work without having to store a great number of pieces, therefore, we get a considerable saving, more comfort and more space. We obtained the product after a thorough study in collaboration with professionals who have been using them with great satisfaction.

TECHNICAL FEATURES: Easy work with spatula. Plain finish without pores. Burns without traces.

BOX OF PREFORMED WAX PATTERNS IN BLOCK: Box of 432 pieces; 6 shapes, 3 sizes. Blocks of 2 piece for incisive and 3 pieces for molars and premolars. Replacements: Bags of 24 pieces.

In order to take advantage of the space and more comfort, we have reduced the number of models from 8 to 6, therefore, the professional can carry out a perfect work with less pieces.
